Background

Summary

I apply 20 years of experience in GeoSpatial to the planning and deployment of enterprise scale Spatial Data Infrastructure. I lead in all aspects of system implementation from the development of GIS strategies and business cases through to configuration, training and sign-off.

I believe in LI for the masses. My mission is to expand and improve the use of LI within my organization. I provide an increasing number of customers with the tools and data they need to successfully include location in their analyses.

As the reach of LI increases, so do my challenges:
Ensure Data Quality and Integrity - so all of my customers use the latest-greatest data I can provide to drive decisions
Exercise Control Over Spatial Data Creation and Maintenance - I can't ensure data integrity without doing this
Simplify and Scale - I can no longer think of one-off projects, too many silos to

Experience
